

Clock

Match up! ANSWERS

On the left the time is shown in an analogue format, on the right the time is shown in a 24 hour digital format. Can you match the same time shown in the 2 different formats by drawing a line between them?

The image shows five analogue clock faces on the left and five digital clock displays on the right. Lines connect the analogue clocks to their corresponding digital times:

- Analogue clock 1 (12:15) is connected to digital display 1 (12:15).
- Analogue clock 2 (03:30) is connected to digital display 2 (03:30).
- Analogue clock 3 (07:45) is connected to digital display 3 (07:45).
- Analogue clock 4 (04:15) is connected to digital display 4 (04:15).
- Analogue clock 5 (16:15) is connected to digital display 5 (16:15).
